With its discreet design, the VECTOTHOR KESTREL is designed for offices, cafés, restaurants and shops where your patrons sit and you want to discretely eliminate troublesome flying insects.

The innovative design of the VECTOTHOR KESTREL allows it to be mounted square on the wall or like a diamond. 30% improved performance over conventional units due to its unique attraction grid, which reflects the light onto the landing spot thereby stimulating the landing behavior of flying insects.

VECTOTHOR KESTREL USES CUTTING EDGE SCIENCE TO FLY AHEAD OF THE COMPETITION
